## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15, 18-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 14, the step of using a defined stimulation is indefinite since there is no previous step that defines simulation. Additionally, claim as a whole use the defined simulation step, in which step self is indefinite, makes whole claim indefinite.

In claim 16, the use of alternative language for the location of the resistor is indefinite, such as is it only arranged in a channel or also to the exit of probe. Additionally, "exit of the probe" is indefinite language.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 16, 17, 22, and 24 rejected under 35 U.S.C. 102(b) as being anticipated by Okabe et al, article title "Headphone response on real ears and a head and Torso simulator".

Art Unit: 2863

Regarding to claimed invention, Okabe et al teaches an apparatus for determining the acoustic impedance comprising probe, a microphone connected in channel see Figure 2. Figures 3 and 4 shows frequency response of the probe tube and the measuring point in the outer ear, and a microphone M. Okabe et al also discloses an prior art that teaches ear simulator (C coupler) terminated in a simple resistance element of 340 cgs acoustic ohms.

***Allowable Subject Matter***

3. Claims 23 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-15, 18-21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
